Carol S. Comer, Director

JUN 04 2018

Mr. James H. Eggers
Laboratory Director
Keystone Laboratories, Inc. (Lab# 140)
1140 West Cambridge Circle Drive
Kansas City, KS 66103

Dear Mr. Eggers:

Based upon an evaluation of laboratory data by staff of the Missouri Department of Health and Senior Services and the on-site evaluation performed by the Kansas Health and Environmental Laboratories, it is the recommendation of the Laboratory Certification Officer that Keystone Laboratories, Inc., is reciprocally certified under the provisions of the Missouri Public Drinking Water Regulations to perform bacteriological analyses for public water supplies in the State of Missouri for the following parameters:

Total Coliform *E. coli*

Enclosed please find a certificate of approval and a certified parameter list for your laboratory. The certified parameter references the parameters, methods of analysis, and personnel that have been approved by the State of Missouri to complete bacteriological testing for public water supplies. Your Missouri certification will expire on April 30, 2019, and is contingent upon no changes of the approved methods, analysts, or equipment.

Should there be any changes to your Kansas certification status, please notify this office within 30 days. Any notifications or inquiries related to the approval may be directed to Ms. Ellen Harrel of my staff, who may be reached at P.O. Box 176, Jefferson City, MO 65102 or by telephone at 573-751-1077.

Sincerely,

WATER PROTECTION PROGRAM

David J. Lamb, Chief
Public Drinking Water Branch
